About me

Fullstack developer with hands-on experience in building and deploying web applications. Focused on clean code, maintainable architecture and practical problem solving. Comfortable working across frontend and backend, from UI to API and database design.

Tech Stack

Frontend:

JavaScript (ES6+), Vue, React, Vite, TailwindCSS

Backend:

PHP, Node.js, Laravel, REST API, MySQL, PostgreSQL

DevOps:

Docker, Docker Compose

Projects

Task Manager — Fullstack Web Application

- Designed and implemented a kanban-style task management application
- Built REST API backend using PHP
- Designed relational database schema (MySQL)
- Implemented drag-and-drop user interface
- Dockerized development environment for consistent setup

Experience

Independent / Personal Projects
